
(a) Matched edits (illustration)
same pin · same cutout and fill · same distance
Source
one pin per compartment
Valid sham (allowed)
moved within its compartment
Fault (breaks the rule)
same move into the neighbour; 2 targets
Vacancy only
pin removed; 1 target
(b) After an alarm on the fault: which compartments are opened?
Class-wide target
compartment scores at test
compartments opened
$g \geq t_c$
training mask y: every pin of the class marked
(grey: vacated spot, marked in both)
13 of 15
2 targets + 11 untouched
Footprint target
compartment scores at test
compartments opened
$g \geq t_c$
training mask y: only the pasted pin marked
(grey: vacated spot, marked in both)
2 of 15
2 targets + 0 untouched
t_c
target
queued untouched
